

THERE IS MORE TO YOU.

I believe that there is more to everyone. As an executive coach, I want to support individuals to find and unleash the resources that are within them. And I want to support teams in creating stronger bonds, thereby performing more effectively.

For Businesses

In team coaching sessions and workshops, we turn your team into a winning team that achieves great things and also enjoys working together. Together we can...

- 📞 develop strategies to effectively resolve conflicts and make good business decisions
- 📞 improve communication both within your team and with customer
- 📞 teach your team to deal with stress effectively
- 📞 prepare your team to overcome dry spells and setbacks with perseverance and a positive attitude

For Individuals

Let's work on your goals together! We will work well together if...

- 📞 You want to prepare with me for an important professional or personal challenge
- 📞 As a manager, you want to lead your team to success
- 📞 You are currently juggling (too) many people and things at the same time and need help in setting your priorities
- 📞 After your studies, you need clarity about what you really want to do - so that you can then successfully go through job interviews and assessments
